**UNAUDITED INTERIM FINANCIAL REPORT
FOR THE FOURTH QUARTER ENDED 30 NOVEMBER 2015**

**(B) EXPLANATORY NOTES PURSUANT TO MAIN MARKET LISTING REQUIREMENTS OF
BURSA MALAYSIA SECURITIES BERHAD**

1. Review of Performance

For the current quarter ended 30 November 2015, the Group registered a turnover of RM24.54 million and profit before tax of RM1.13 million, as compared to a turnover of RM9.29 million and profit before tax of RM2.31 million incurred in the preceding year corresponding quarter. Profit reported during the current quarter was largely attributed to the revenue and profit contributions from both the Property Development and TIS segments. Profit reported in preceding year corresponding quarter was mainly due to the gain on disposal of the Group's landed property.

For the current financial year ended 30 November 2015, the Group reported a turnover of RM56.66 million and profit before tax of RM1.59 million, as compared to a turnover of RM31.99 million and profit before tax of RM1.18 million achieved in the preceding year. The improvement in performance during the current financial year was mainly due to higher turnover and profit contributions from the Property Development and TIS segments and higher share of associated companies' profits.

The performance of the respective segment of the Group is summarized as follows:-

ICT Segment

Overall the sales of certain Telematics products and services during the financial year were slower due to the slowdown in certain segments of the auto industry. In addition, the increase in operating costs and the weakening of Ringgit Malaysia against major foreign currencies has resulted in the increase in costs. Thus, these have resulted in loss being reported in the current financial year as compared to profit achieved in the preceding year.

Property Development Segment

This new segment contributed substantially to the Group's turnover and profit during the financial year. The revenue and profit before tax posted during the current financial quarter and year were derived from the improvement in sales activities and constructions progress billings from the sales of residential properties.

TIS Segment

Greater profit reported during the current quarter and year was contributed by the increase in turnover generated from higher progress billings achieved via a number of completed civil infrastructure projects.

Others Segment

Lower loss registered for the current quarter and financial year was mainly due to the profit derived by a subsidiary company involved in component trading.

Profit reported in previous financial year was attributed to the gain on disposal of the Group's landed property.

AMTEL HOLDINGS BERHAD (409449-A)
(Incorporated in Malaysia)

2. Material Changes in the Profit Before Tax for the Quarter Reported on as Compared with the Immediate Preceding Quarter.

The Group posted a profit before tax of RM1.13 million for the current quarter under review as compared to profit before tax of RM1.29 million registered in the immediate preceding quarter due mainly to the increase in turnover generated by the TIS and Property Development segments and share of higher profit of associated companies.

3. Prospects for the Next Financial Year

Despite the global economic uncertainties and the weakening of the Ringgit against the major currencies, the Group managed to overcome these challenges and achieved positive results for this financial year.
