**UNAUDITED INTERIM FINANCIAL REPORT
FOR THE FIRST QUARTER ENDED 29 FEBRUARY 2016**

**(B) EXPLANATORY NOTES PURSUANT TO MAIN MARKET LISTING REQUIREMENTS OF
BURSA MALAYSIA SECURITIES BERHAD**

1. Review of Performance

The Group recorded a turnover of RM8.42 million and loss after tax of RM0.74 million for the first financial quarter ended 29 February 2016, as compared to turnover of RM8.43 million and loss after tax of RM0.37 million registered in the preceding year corresponding quarter. Despite marked improvement in the property development segment, a higher loss was reported mainly due to the drop in the performance in the ICT business segment.

The performance of the respective segment of the Group is summarized as follows:-

ICT Segment

ICT segment recorded lower turnover and loss after tax during the quarter under review as compared to preceding year corresponding quarter. This was mainly due to the slowdown in the demand of Telematics products and services from existing customers. In addition, the increased in material and operating costs has also resulted in the drop in profit margin.

Property Development Segment

The turnover and profit reported during the current quarter was primarily attributable to the sales of residential properties and profit recognition from the development works in progress. Loss was reported in preceding year corresponding quarter as the property construction was then at its early stage of piling and ground works.

TIS Segment

This segment posted an increase in turnover and profit after tax during the current quarter as compared to loss reported in preceding year corresponding quarter. This was mainly driven by higher progress billings and profit achieved via an increase number of completed civil infrastructure and highway expansion projects.

Others Segment

Loss recorded during the current quarter and preceding year corresponding quarter was attributed to the operating costs incurred by the investment holding company.

2. Material Changes in the Profit Before Tax for the Quarter Reported on as Compared with the Immediate Preceding Quarter.

The Group posted a loss after tax of RM0.74 million for the current quarter under review as compared to profit after tax of RM0.80 million achieved in the immediate preceding quarter. This was attributable to lower performance reported by the ICT business segment.

AMTEL HOLDINGS BERHAD (409449-A)

3. Prospects for the Current Financial Year

The management expects the current competitive business environment and the continuous fluctuation in the exchange rates to pose challenges to the Group's businesses. Nevertheless, the Group will continue to focus on various cost control exercises to contain overheads and improve operational processes to achieve greater efficiency and productivity.

The management will also continue to explore new business opportunities to strengthen the Group's revenue stream and performance. We expect the property development segment to continue to contribute positively to the Group's results. Barring any unforeseen circumstances, the Board expects the Group to deliver satisfactory performance in this financial year.

4. Variances of Actual Profit from Forecast Profit

Not applicable.

5. Taxation

The taxation for the Group for the current financial quarter and period under review was as follows:-
