(B) EXPLANATORY NOTES PURSUANT TO MAIN MARKET LISTING REQUIREMENTS OF BURSA MALAYSIA SECURITIES BERHAD

1. Review of Performance

The Group reported a turnover and profit before tax of RM12.639 million and RM0.869 million respectively for the current quarter under review as compared to RM16.495 million and RM1.184 million reported in preceding year corresponding quarter. The decrease in turnover for the current quarter as compared to preceding year corresponding quarter was mainly because a subsidiary company has scaled down its sales of two-way radio communications products. Consequently lower profit was recorded for the current quarter under review as compared to preceding year corresponding quarter.

The Group's turnover for the six months ended 31 May 2012 amounted to RM27.885 million, which is lower than that of the preceding year corresponding period of RM30.335 million. Lower revenue recorded was mainly caused by the drop in sales of two-way radio communications products and infrastructure business. However, this was offset by the significant increase in revenue and profit reported by the sales of Telematics & mapping products. Consequently, the Group registered an improved performance for current period with a profit before tax of RM2.381 million as compared to RM1.872 million reported in preceding year corresponding period. In addition, higher profit contribution from associated company also contributed to the improved performance for current period.

The performance of the respective segment of the Group is summarized as follows:-

ICT Segment

ICT segment continued to be the main contributor to the Group's turnover for the current period, accounted for approximately 97% of the Group's turnover for current period mainly from sales of Telematics and mapping products.

The drop in revenue and profit before tax registered for the current quarter as compared to preceding year corresponding quarter was mainly due to the dip in sales of two-way communications products by a subsidiary which has scaled down its operation. However the enhanced performance achieved from the sales of Telematics and mapping products in the first quarter and current period leads to the overall improvement in current period's performance as compared to preceding year corresponding period.

TIS Segment

Higher revenue was reported by the TIS segment in preceding year corresponding period due to the sales of alternate telephony charges services by a former subsidiary. For current quarter and period under review, the marginal loss posted is within expectation due to lower revenue recorded by the subsidiary engaged in the installation of fiber optic cables and civil works business due to keen market competition.

The Group recorded a profit before tax of RM0.869 million for the current quarter under review as compared to RM1.512 million reported in the immediate preceding quarter. The slow down in car sales was caused by lower loan approval rate after the new bank lending guidelines were implemented.

3. Prospects for the Current Financial Year

The Group will continue to focus on the growth of its core ICT business.
