**UNAUDITED INTERIM FINANCIAL REPORT
FOR THE THIRD QUARTER ENDED 31 AUGUST 2015**

**(B) EXPLANATORY NOTES PURSUANT TO MAIN MARKET LISTING REQUIREMENTS OF
BURSA MALAYSIA SECURITIES BERHAD**

1. Review of Performance

For the current quarter ended 31 August 2015, the Group registered a turnover of RM12.71 million and profit before tax of RM1.29 million, as compared to a turnover of RM7.50 million and loss before tax of RM0.19 million incurred in the preceding year corresponding quarter. Profit reported during the current quarter was attributed to the revenue and profit contributions from both the Property Development and ICT segments.

For the current financial period ended 31 August 2015, the Group reported a turnover of RM32.12 million and profit before tax of RM0.45 million, as compared to turnover of RM22.70 million and loss before tax of RM1.13 million incurred in the preceding year corresponding period. The improvement in performance was due mainly to the increase in turnover and profit contributions from the Property Development and TIS segments during the current financial period.

The performance of the respective segment of the Group is summarized as follows:-

ICT Segment

There was an increase in revenue during the current period as compared to preceding year corresponding period. However, the sales of certain Telematics products and services in the previous financial quarter were slower due to the slowdown in the auto industry. In addition, the increase in operating costs and the weakening of Ringgit Malaysia against foreign currencies has resulted in the increase in material costs. Thus, this has resulted in lower profit being reported in the current financial period as compared to profit achieved in the preceding year corresponding period.

Property Development Segment

This segment posted an increase in revenue and profit before tax during the current financial quarter and period deriving from the improvement in sales activities and constructions progress billings from the sales of residential properties.

TIS Segment

Profit reported during the current quarter and period was contributed by the increase in turnover generated from higher progress billings achieved via a number of completed civil infrastructure projects.

Others Segment

Loss registered for the current quarter and period is mainly attributed to the operating costs incurred by the investment holding company.

AMTEL HOLDINGS BERHAD (409449-A)
(Incorporated in Malaysia)

2. Material Changes in the Profit Before Tax for the Quarter Reported on as Compared with the Immediate Preceding Quarter.

The Group posted a profit before tax of RM1.23 million for the current quarter under review as compared to loss before tax of RM0.50 million registered in the immediate preceding quarter due mainly to the increase in turnover generated by the ICT and Property Development segments and share of profit of an associated company.

3. Prospects for the Current Financial Year

The business environment for the last quarter of year 2015 is expected to continue to be challenging for our country amid the global economic uncertainties and the weakening of the Ringgit against the major currencies. The Group will continue to focus on various cost control exercises to streamline its operational processes in order to stay vigilant during this challenging period.

Nevertheless, the property development project which is in progress is expected to continue to contribute positively to the Group's earnings for the remaining financial quarter. Barring any unforeseen circumstances, the Board expects the Group's performance to remain satisfactory for the financial year ending 30 November 2015.
