**UNAUDITED INTERIM FINANCIAL REPORT
FOR THE THIRD QUARTER ENDED 31 AUGUST 2016**

**(B) EXPLANATORY NOTES PURSUANT TO MAIN MARKET LISTING REQUIREMENTS OF
BURSA MALAYSIA SECURITIES BERHAD**

1. Review of Performance

For the current quarter ended 31 August 2016, the Group achieved a turnover of RM12.50 million and profit after tax of RM44 thousand, as compared to a turnover of RM12.71 million and profit after tax of RM0.90 million recorded in the preceding year corresponding quarter. Despite improvement in the TIS segment, lower profit was reported during the current quarter mainly due to the drop in performance in the ICT business segment.

For the current financial period ended 31 August 2016, the Group reported a turnover of RM30.35 million and loss after tax of RM1.22 million, as compared to turnover of RM32.12 million and profit after tax of RM11 thousand achieved in the preceding year corresponding period. Loss was registered in the current financial period mainly attributed to lower performance from the ICT and Property Development segments.

The performance of the respective segment of the Group is summarized as follows:-

ICT Segment

Lower segment turnover and loss after tax was posted during the quarter and period under review as compared to preceding year corresponding quarter and period. This was mainly attributable to lower level of sales recorded and the slowdown in the demand of Telematics related products and services from existing customers. In addition, the increase in material costs due to the unfavorable exchange rate has also affected the profit margin.

Property Development Segment

The turnover and profit posted during the current period was primarily attributable to the sales of residential properties and profit recognition from the on-going development works. Lower performance was reported in current period due to the lack of new sales and lower profit contribution from properties development works in progress.

TIS Segment

Improved performance in both turnover and profit after tax was achieved in the current quarter and period as compared to preceding year corresponding quarter and period. This was mainly due to higher progress billings from various on-going civil infrastructure works and projects and profit recognised via an increase number of completed projects.

Others Segment

Loss recorded during the current period and preceding year corresponding period was attributed to the operating costs incurred by the investment holding company.

AMTEL HOLDINGS BERHAD (409449-A)
(Incorporated in Malaysia)

2. Material Changes in the Profit Before Tax for the Quarter Reported on as Compared with the Immediate Preceding Quarter.

The Group posted a profit after tax of RM44 thousand for the current quarter under review as compared to loss after tax of RM0.53 million reported in the immediate preceding quarter. Profit recorded during this quarter is mainly due to increase in the performance from the ICT segment and share of profit of associated companies' results.

3. Prospects for the Current Financial Year

The current fluctuations in currency exchange rates and material costs will continue to be a challenge to the Group's operations. The Group is cautious with the competitive business environment ahead and will continue to focus on expanding its existing revenue generating business activities whilst exploring potential new business opportunities to strengthen the Group's performance.

Barring any unforeseen circumstances, the Group expects its overall performance for the current financial year to remain satisfactory.

4. Variances of Actual Profit from Forecast Profit
