1. Review of Performance

The Group recorded a turnover of RM11.96 million and loss after tax of RM0.64 million for the current quarter, as compared to turnover of RM6.18 million and loss after tax of RM1.06 million reported in the preceding year corresponding quarter. The increase in turnover was mainly contributed by revenue increase from ICT segment. Despite registered a higher turnover, loss was reported during the quarter mainly attributed to impairment on trade receivables amounting RM0.70 million reported by the Property Development segment and the increase in amortization of intangible assets by the ICT segment of RM0.58 million.

For the six months ended 31 May 2018, the Group's revenue was RM22.78 million which is approximately 32.5% higher than RM17.19 million reported in the preceding year corresponding period. In tandem with the increase in revenue and margin, ICT segment registered a higher profit after tax both during the current quarter and period. Improved performance was mainly attributed to higher sales volume of new car models fitted with our Telematics products and increase in sales of automotive accessories.

TIS Segment
